- JavaScript
- React
- Redux
- HTML
- CSS
- SQL
- NoSQL
- WordPress
- Postgres
- MongoDB
- GCP
- Express
- Node.JS
- GraphQL

Experience

Software Engineer | Green Tortoise Hostel - San Francisco, California | 06/2024 - 10/2024
- Analyzed and streamlined operational workflows to identify redundant tasks and developed tailored solutions.
- Designed and implemented custom hooks integrated with Cloudbeds using Google Cloud Platform (GCP), enabling staff to automate repetitive tasks and concentrate on enhancing the customer experience.

Software Engineer | Wild Earth - Berkeley, California | 04/2021 - 09/2023
- Integrated third-party services, including Yotpo, Intercom, and Shopify, enhancing platform functionality and improving the overall user experience of the website.
- Developed a reusable Gutenberg block library in React for WordPress, streamlining content creation and enabling non-technical users to manage site updates efficiently.
- Transformed the API into a microservices-based system, optimizing scalability, reliability, and maintainability.
- Built an interactive quiz to help users choose the right product, quantity, and delivery schedule, boosting sales and improving customer satisfaction.
- Collaborated with marketing, design, and customer support teams to ensure seamless product launches and user experience improvements.

Front End Engineer | Freelance | 03/2020 - 04/2021
- As a dedicated full-time freelancer, I specialized in front-end development, delivering high-quality solutions and enhancing user experiences.

Education

Full-Stack Web Development Bootcamp

UC Berkeley Extension | Berkeley, California | 09/2019 - 03/2020
